## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on May 17, 2007 and June 12, 2007 have been entered.

### *Drawings*

2. The drawings were received on June 12, 2007. These drawings are acceptable.

### *Claim Rejections - 35 USC § 102*

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 1, 6, and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Pouilloux (3,815,652).

See Pouilloux '652 embodiments of Figures 1-6 and 10, col. 2 line 3 - col. 5 line 56 and col. 5 line 66 - col. 6 line 20: a single cord or at most a "small number" of cords necessarily includes two cords, and the claims do not yet exclude the multiple circumferential turns forming the carcass of the reference contrary to applicant's arguments. Note that the first and second filaments are in parallel from bead region to bead region (col. 2 lines 3-54 for example). As to claim 6, the disclosed genus is sufficiently small that one of ordinary skill in the art would have at once envisaged the species of three cords from the genus of a single cord or at most a "small number" of cords.

***Claim Rejections - 35 USC § 103***

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pouilloux (3,815,652) in view of Dyer et al. (6,068,721).

See paragraph 4 above: it is well known that a geodesic carcass cord path has certain advantages, as evidenced by Dyer et al. (col. 1 line 5 - col. 2 line 11) for example, therefore it would have been obvious to one of ordinary skill in the art to provide a geodesic carcass cord path in the above tire in order to obtain its well known advantages.
